Contents

Retransmitting a Ticket	3
Destroyed Markings	3
Jnmarked Facilities	6
Additional Assistance	9
Nember Response	12

This manual is intended to provide instruction to users of the OneCallAccess program on ticket actions.

The information contained in this manual includes a description of each retransmit.

Retransmitting a Ticket

A ticket may be retransmitted because of marking issues only at this time. Retransmitting a ticket does not change the ticket number. Retransmitting a ticket results in an update to the version or revision number. The revision number is found after the dash at the end of the ticket number. An example of an original ticket number is 2021112000003-000. No revision exists on an original ticket, so the revision number is -000. The first revision would result in a change to the version or revision number 2021111200003-001.

Tickets with erroneous information may not be retransmitted to correct the issue. To correct an error, the ticket is canceled and replaced. A ticket may be canceled up to the work legal start date on the ticket.

Updating the field contact information or adding details to aid the locator in finding or accessing the site is acceptable when retransmitting a ticket. This information may include driving instructions, an access point to the dig site, or a gate code. Updates to the type of work, activity, or work location are not acceptable. These changes would require a replacement ticket.

Positive Response must be reviewed prior to transmitting a ticket for Unmarked Facilities, Destroyed Markings, or Additional Assistance. Specify which facility owners/operators are required to respond to the request based on positive response postings and field conditions. It is not acceptable to request a response from all facility owners/operators as a replacement for checking positive response.

A ticket may be retransmitted after the work legal start date of the most recent revision of the ticket. The work legal start date can be found on the ticket.

Destroyed Markings

When markings are removed, destroyed, or are no longer visible or reliable, a ticket may be retransmitted for destroyed markings. Facility owners are required to respond within 24 hours on business days.

WHO: All Users of the system

WHEN: Between the work legal start date and the work expiration date (minus 24 hours).

PROCEDURES

- 1) If the ticket is one of the last five tickets placed, click on the ticket under Recent History on the Home page of OCA to display the ticket.
- 2) Click History to search for the ticket if it is not found in recent history.
- 3) Enter the ticket number with the most recent revision number, and the date (or date range) the most recent revision of the ticket was placed.

Member Response

Only the Station Codes selected on the Station Codes List will be notified of the request, Station Codes not selected will not be notified of this request. Once a retransmit has been submitted on a ticket, the ticket details will appear showing all information included on the ticket and the members that are notified of the request.

In the ticket details under Affected Members, the Station Codes selected from the Station Codes list will show a status of "Manual Retransmit". If a member shows the status of "Manual Retransmit", this means that they were notified and are required to respond to this request. The Station Codes not selected in the Station Codes list will have a status of "Response Not Requested" and these members are not notified and not required to respond to this request.
