Ticket Actions Overview

After a ticket is submitted, circumstances may require a ticket to be canceled, updated, or retransmitted. This guide provides instruction to perform each action. The actions contained in this manual are currently available in the OneCallAccess system (OCA). Additional actions may be added in future OneCallAccess updates.

Retransmitting a ticket

A Ticket may be retransmitted because of marking issues only at this time. Retransmitting a ticket does not change the ticket number. Retransmitting a ticket results in an update to the version or revision number. The revision number is found after the dash at the end of the ticket number. An example of an original ticket number is 202111200003-000. No revision exists on an original ticket, so the revision number is -000. The first revision would result in a change to the version or revision number 202111200003-001.

Tickets with erroneous information may not be retransmitted to correct the issue. To correct an error, the ticket is canceled and replaced. A ticket may be canceled up to the work legal start date on the ticket.

Updating the field contact information or adding details to aid the locator in finding or accessing the site is acceptable when retransmitting a ticket. This information may include driving instructions, an access point to the dig site, or a gate code. Updates to the type of work, activity, or work location are not acceptable. These changes would require a replacement ticket.

Positive Response must be reviewed prior to transmitting a ticket for Unmarked Facilities, Destroyed Markings, or Additional Assistance. Specify which facility owners/operators are required to respond to the request based on positive response postings and field conditions. It is not acceptable to request a response from all facility owners/operators as a replacement for checking positive response.

A ticket may be retransmitted after the work legal start date of the most recent revision of the ticket. The work legal start date can be found on the ticket.

Destroyed Markings

When markings are removed, destroyed, or are no longer visible or reliable, a ticket may be retransmitted for destroyed markings. Facility owners are required to respond within 24 hours on business days.

WHO: All Users of the system

WHEN: Between the work legal start date and the work expiration date (minus 24 hours)

PROCEDURES

- 1) If the ticket is one of the last five tickets placed, click on the ticket under Recent History on the Home page of OCA to display the ticket.
- 2) Click History to search for the ticket if it is not found in recent history
- 3) Enter the ticket number with the most recent revision number, and the date (or date range) the most recent revision of the ticket was placed
- 4) Click search
- 5) Click on the ticket to display the ticket details

- 10) Click Submit.
- 11) Ticket details will display. A confirmation email is sent.

Cancel

A ticket may be canceled because work is no longer taking place, there is an error on the ticket or because there is a duplicate ticket for the job.

Who: All users of the system

When: Up to the Work Legal Start Date on the ticket

- 1) If the ticket is one of the last five tickets placed, click on the ticket under Recent History on the Home page of OCA to display the ticket.
- 2) Click History to search for the ticket if it is not found in recent history.
- 3) Enter the ticket number, including the revision number -000, and the date (or date range) the ticket was placed
- 4) Click search
- 5) Click on the ticket to display the ticket details
- 6) Click Actions on the upper right side of the page
- 7) Choose Cancel – A pop up box will display
- 8) Enter the reason for the cancellation
- 9) Click Send

Ticket Cancellation ✕

Please enter the reason for the Ticket Cancellation eg: Work no longer taking place, duplicate ticket, etc.

Work No longer taking place

Operator Fault?

Abort Send

- 10) The ticket details will display. The ticket status is Cancelled.

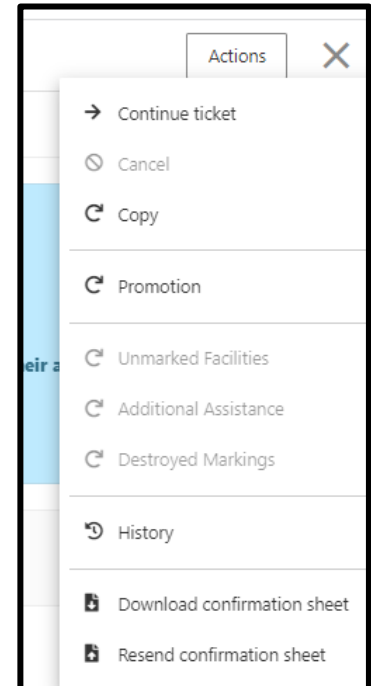

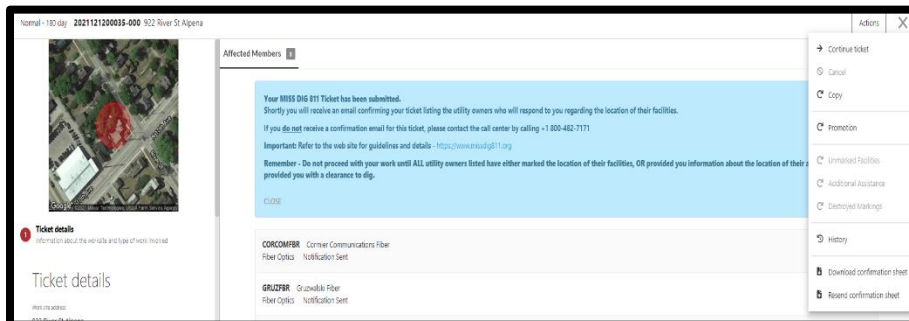

Continue

When a job is too large to fit into a single ticket, the continue ticket feature makes it easy to create multiple tickets. The work polygon from the chosen ticket is visible on the map so the user can easily create a new polygon that picks up where the other ticket left off.

Who: All users of the system

When: Anytime

- 1) Continue ticket may be chosen immediately after a ticket is placed. When the ticket summary page appears upon submitting a ticket, click Actions from the upper right side of the page.
- 2) Click Continue Ticket
 - a. If the continue ticket feature is not chosen upon submitting a ticket, the reference ticket can be found in Recent History or History. If the ticket is one of the last five tickets placed, click on the ticket under Recent History on the Home page of OCA to display the ticket.
 - b. Click History to search for the ticket if it is not found in recent history.
 - c. Enter the ticket number, including the revision number -000, and the date (or date range) the ticket was placed
 - d. Click search
 - e. Click on the ticket to display the ticket details
 - f. Click Actions on the upper right side of the page
 - g. Click Continue Ticket

- 3) Review ticket details and adjust as needed
- 4) Click Next to go to section 2 Dig Site Location
 - a. The polygon from the reference ticket is visible. Create a polygon that covers the next portion of the project
 - b. Click Next
- 5) Enter the location information in the Confirm Dig Site. This information is included on the ticket.
- 6) Click Next
- 7) Enter Remarks, if needed.
- 8) Check the agreement boxes
- 9) Click Submit. The previous ticket is referenced on the new ticket.
