PRESENTED BY MISS DIG 811

## Nick Bonstell

President & CEO, MISS DIG 811

### Mapping the Future with Live Digital Twins – Is Your Digital Twin Telling the Truth?

Tues. 2/3

1:00 p.m.

Banquet Rooms 7 & 8

Nick Bonstell serves as President and CEO of MISS DIG 811, a Michigan based Non-Profit Corporation that serves as Michigan's utility safety notification system. Established as the nation's first statewide one-call system, MISS DIG 811 continues to lead in advancing damage prevention processes and education initiatives, ensuring the protection of the public, environment, property, and infrastructure.

Nick has strategically aligned MISS DIG 811's investment in GIS technology, implemented proactive field engagement, and relocated the organization's headquarters to Lansing, Michigan. Committed to innovation and stakeholder satisfaction, Nick guides the organization's vision towards developing the next generation of excavation notification systems while enhancing the overall user experience.

Bonstell's experience combines a background of critical infrastructure protection and public safety leadership. Mr. Bonstell has served as the Chair of the Region 6 Homeland Security Planning Board and currently contributes to the Michigan Damage Prevention Board and the Common Ground Alliance OCSI Data Team, advocating for continuous improvements in damage prevention.
