

Board of Directors Open Seats Notice

MISS DIG 811 is currently looking to fill the Long Distance Carrier and Pipeline Operator seats on our Board of Directors.

The age-old saying goes, "You're only as good as the people you surround yourself with."

MISS DIG 811 wants to surround ourselves with the best. We are looking for individuals who have demonstrated significant achievements in damage prevention, business, or public service to serve on our Board of Directors. We recognize that each employee brings unique capabilities, experiences, and characteristics to work; we value such diversity at all levels of the company in everything we do. The MISS DIG 811 Diversity Statement and Policy applies to all levels of our organization.

The focus of MISS DIG 811 is the protection of underground facilities and those working near them; therefore, experience in damage prevention and safe excavation practices are of value. As a member of the Board, you will help set the direction of MISS DIG 811.

The Board meets quarterly to review the financial standing of MISS DIG 811 and progress on organizational objectives. Feedback and insight from our Board of Director's aid senior leadership in addressing the concerns of our members and the needs of our users. The overall capability and experience of individual Board candidates will determine one's aptness. The attributes outlined in MISS DIG 811 Candidate Considerations are desirable in all Board of Director candidates.

41% of non-profits struggle with recruiting quality board members who are passionate about the non-profit's mission; damage prevention work is too crucial for MISS DIG 811 to be another statistic.

If you are interested and can contribute your time, thoughtfulness, and leadership for the three-year term of a board seat, please contact our Vice President of Business Operations, Laura Arnold, or Interim Chief Executive Officer, Joseph Guadagnino.
