

THE **MISSDIG811** MEMBER OUTREACH

JANUARY 2026

ISSUE 26

One Ticket, One Team

The mission of MISS DIG 811 is to safeguard the public, environment, property, and member infrastructure through efficient educational outreach and the advancement of damage prevention processes for our members.

Registration Is Filling Fast. [Secure Your Spot Today.](#)

Don't miss this important industry event! Over two days, you'll hear from industry speakers, explore practical, field-focused topics, and connect with peers across excavation, locating, utility operations, emergency response, and damage prevention leadership.

Important Information for MISS DIG 811 Members

The **Annual General Membership Meeting** will take place on:

February 3, 2026, 8:30 a.m.

Exhibit Hall C, Lansing Center

333 E. Michigan Ave., Lansing, MI 48933

Proxy forms are valid for two years. If your organization needs to update its designated proxy for voting purposes, please complete the proxy update form [here](#).

There are three open seats on the Board of Directors. Online voting opened on Tuesday, January 20, 2026.

February 2-4, 2026 | Lansing Center - Lansing, MI | [GreatLakes811Expo.com](#)

Upcoming DamagePreventionPortal (DPP) Enhancements

All DPP user accounts will soon have access to two brand-new reports within the interface.

With a future update, every user will be able to view Positive Response logs and ticket details, providing deeper insights into their data.

The new reports can be found in the main menu, and the data is available per month. At this time, reports are not available through delegations to third parties.

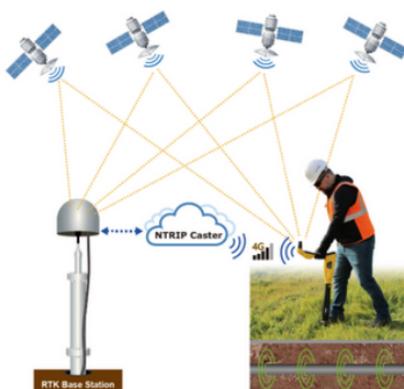

Once generated, the reports will appear onscreen and can be exported in CSV, XLSX, or JSON formats.

We're excited to release this functionality to our users and look forward to enhancing your experience.

Additional information on upcoming system updates will be available online at [Resources](#) and [What's New](#).

Download the MISS DIG 811 Mobile App!

Whether you're an excavator, contractor, facility owner, or member of the general public, the app makes it simple to check positive responses for your ticket, explore excavation activity in your area, and learn safe digging practices.

A GIS Mapping Project for Safer, Smarter Infrastructure

MISS DIG 811 is launching a pilot program to modernize utility mapping—and we're inviting forward-thinking municipalities to lead the way!

We believe the future of damage prevention lies in collaboration, technology, and accessible data. Our goal: All Michigan facility owners using digital records of underground infrastructure, with

excavators able to verify markings on-site. Since many municipalities lack resources to digitize records, this program helps create accurate digital maps.

Interested? Click [HERE](#) to complete our GIS Pilot Survey.
