---

## [Selective Ticket Action](#)

**MISS DIG 811 is pleased to announce that the Selective Ticket Action feature in OneCallAccess will be available beginning December 6, 2023.**

**Selective Ticket Action allows excavators control over which facility owner/operator members will receive a retransmitted ticket from a list of station codes the original ticket was delivered to.**

	STATION CODE	RESPONSE CODE	RECEIVED
<input checked="" type="checkbox"/>	200ARN Arnold Advantage	ARNRFR	999 11/28/2023
<input checked="" type="checkbox"/>	CLOVERLAND ELECTRIC COMPANY ELECTRIC	CLOVER	999 11/28/2023
<input type="checkbox"/>	Cormier Communications Fiber Optics	CORCOMFR	001 11/28/2023
<input type="checkbox"/>	Gruzowski Fiber	GRUZFBR	001 11/28/2023
<input checked="" type="checkbox"/>	PelicanCorpTest1	PCT1	999 11/28/2023
<input checked="" type="checkbox"/>	PelicanCorpTestMS	TESTMS	999 11/28/2023

**Response information will be provided to assist the excavator in excluding any station that has already posted a response code. So, if a station code has already posted to Positive Response, the excavator can opt not to send a retransmit for Unmarked Facilities to that station code. When a station code is not selected on a retransmit, the response code from the previous ticket revision will be copied across to the new revision automatically.**

**For facility owner/operators and locators, this reduction in receiving notifications for ticket actions not specifically for them can result in cost and time savings.**

**Keep in mind:**

- The excavator can only select from the list of station codes to which the original ticket was sent
- Any station code that is not selected will not receive the revision
- Once a ticket action is submitted, station codes cannot be manually added to that revision if they have been omitted by the excavator
- The system will show, per revision, which station codes have and have not been selected for a revision transmission
- If a station code has already provided a response code and the excavator has not selected them to receive the transmission delivery, the initial response code will be automatically carried over to the new revision

**Documentation on this feature can be found at both [reference.missdig811.org](https://reference.missdig811.org) and [resources.missdig811.org](https://resources.missdig811.org).**
