MISS DIG 811 Welcomes New Board Member

John Ciesielski - Design Representative

MISS DIG 811 is pleased to announce the election of **John Ciesielski, Senior Vice President at Wade Trim**, as the newest Design Representative on the MISS DIG 811 Board of Directors.

Statement from the MISS DIG 811 Board:

"On behalf of the MISS DIG 811 Board of Directors, I would like to congratulate John Ciesielski of Wade Trim on his election as the newest Design Representative member of the MISS DIG 811 Board.

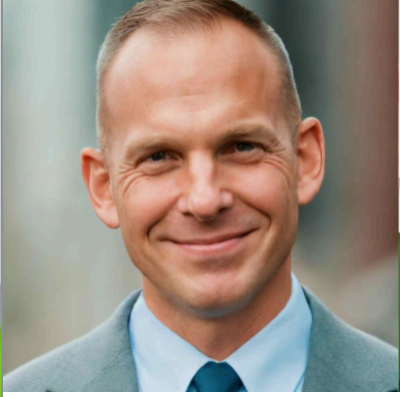

John's election reflects the importance of diverse industry perspectives in guiding how MISS DIG develops and improves Michigan's statewide onecall system and damage prevention education and outreach.

Design representation on the Board helps ensure that the processes, tools, and educational resources we provide are practical, effective, and aligned with how projects are planned long before excavation begins.

John brings a strong designside perspective shaped by his experience serving the Industrial Commercial Energy market. His expertise will be instrumental as MISS DIG continues to advance damage prevention efforts that reduce utility strikes and help prevent property damage, service disruptions, and the serious risk of injury or loss of life.

I would also like to thank the MISS DIG membership for their engagement and participation in the nomination and voting process. Active involvement from the industries that make up Michigan's infrastructure community is essential to fulfilling MISS DIG's mission to safeguard the public, the environment, property, and infrastructure through education, outreach, and the continued advancement of damage prevention statewide."

— Jim Moskal
Board Chair, MISS DIG 811

**SAFETY IS IN YOUR HANDS.
EVERY DIG. EVERY TIME.**

“We are actively working to integrate visual GIS system data into the MISS DIG 811 ticketing process, as well as large-scale project coordination. The future is visual, and we believe Mr. Ciesielski will be a key advisor in helping us get there serving as the Design Engineer representative on the MISS DIG 811 Board of Directors.”

— Nick Bonstell, CEO, MISS DIG 811

Statement from John Ciesielski

“I’m grateful to be part of an organization that plays a critical role in excavation safety and infrastructure protection. I welcome to opportunity to work with a forward-thinking team to advance technology and innovative solutions that strengthen the MISS DIG 811 system.”

— John Ciesielski
Senior Vice President, Wade Trim
