

PRIVATE FACILITY MEMBERSHIP INFO

ALL FACILITIES NOT LOCATED ON PRIVATE LAND FOR PRIVATE USE ARE REQUIRED TO BE MEMBERS OF THE SYSTEM.

This membership is appropriate for condo associations, apartments, mobile home communities, school districts and all other private entities and individuals who own lines that not located exclusively on their private property or lines that are not exclusively for their private use. For example, a condominium complex may own water lines between buildings. The lines are located exclusively within the complex but are providing a service for others. Conversely, a factory may have fiber lines used exclusively by the business but to connect the buildings the lines run through public property.

As a member of MISS DIG 811, unique stations will be established for your underground infrastructure to alert you when others intend on excavating near it.

WHAT DOES IT MEAN TO BE A MEMBER?

- Underground facilities located outside of privately owned land must be located and marked with APWA color codes within the legal response time.
- Positive Response is then posted so the excavator knows that the underground utilities have been marked.
- MISS DIG 811 offers facility types for everything from fiber to tunnels and steam.
- MISS DIG 811 can deliver tickets to multiple locations and deliver based on location.

Begin your onboarding process today by completing the Facility Owner/Operator Membership document located under *New Member Paperwork* at resources.missdig811.org.
