

THE **MISSDIG811** MEMBER OUTREACH

FEBRUARY 4, 2025

ISSUE 15

One Ticket, One Team

Thank you for attending the MISS DIG 811 Annual Meeting & Conference and making it a success! We would not thrive without the continued support and feedback from our members and associates. We look forward to what's in store and even greater achievements in the year ahead.

Cheers to 2025!

System Update Details for DPP from January 30th, 2025

- **ExploreYourData: Results Export Error**
 - The error resulting in the misalignment of exported column headings will be corrected, and the data will once again be displayed correctly.
- **Delegation: Assign User Error**
 - The error impacting the ability to assign users to a third-party delegation has been resolved.

Membership County-Place Area of Interest Data

In the event of a system outage, county-place information will be used to help MISS DIG 811 NSRs notify members of emergencies based on the work location. It is necessary to collect the location(s) in which you or your organization owns/operates underground facilities. The information provided here should match the general location of shapes/polygons provided in your Area of Interest (AOI) file per station code in DamagePreventionPortal. Click on the button below to add your County-Place Information.

Winters in Michigan generally experience a slower excavating season, so it's a great time to complete any mandatory training assigned for your DPP AuthorityViewer, Member Admin, or Member Full user account. Completion of this training will allow you the DPP access associated with the user account type.
